## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to shut off means for a chipper feed roll , classified in class 241, subclass 30.
- II. Claims 33-37, drawn to chipper feed roll control based on engine speed, classified in class 241, subclass 30.
- III. Claims 38-39, drawn to reverse control for chipper feed rolls, classified in class 241, subclass 30.
- IV. Claims 41-42, drawn to chipper software, classified in class 241, subclass 25.
- V. Claims 43-44, drawn to control of chipper feed roll by machine use, classified in class 241, subclass 30.

The inventions are distinct, each from the other because of the following reasons: each Group is basically a feed control system based on different criteria which are independent from each other.

Because these inventions are distinct for the reasons given above and the majority of the search required for each Group is not required for other Groups, restriction for examination purposes as indicated is proper. A telephone call was made to Mr. Sturm on 9/2/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

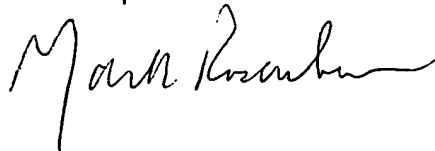

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
